# Data Security

### Regional Data Hosting
Client data is hosted in-region with AWS/Google Cloud, ensuring compliance with GDPR, CCPA, and other local laws while optimizing performance.

### Physical & Network Security
USB ports and external storage are disabled in dev environments to prevent unauthorized data extraction.

### Controlled Production Access
Limited to 1-2 designated team members, enforced with MFA & RBAC for strict security. Client transparency ensured.

### Legal Safeguards
Strong data security agreements and NDAs ensure confidentiality and compliance.

# Testimonial

We love working with Ciphernutz. They are dependable and talented. Given a chance we'll hire them again. Strongly recommended!

We have worked with the Ciphernutz team for the past two years, and they have excelled in frontend development and leadership. They are skilled, efficient, and great at problem-solving.

Working with Ciphernutz was fantastic. Their technical skills are top-notch, and they delivered everything on time with great quality. We highly recommend Ciphernutz and would love to work with them again.

# Testimonial

After launching the app, the client has seen improvements in their operational efficiency. Ciphernutz IT Services' project management is exemplary — they always deliver on time, stay within budget, and address queries and concerns promptly

Ciphernutz IT Services has done a great job of meeting the client's needs. The team manifests their professionalism by delivering quality outputs in a timely manner.
