				Bootstrap
				CSS Media Queries
				CSS Grid
				CSS Flexbox

Business Model:

Conceptual framework that describes to whom business serves, what it delivers, how it gives it, and how it achieves its goals to sustain the firm's profitability

- ✓ Competencies in the market
- ✓ Proposition of value
- ✓ Strategies for competition
- ✓ Revenue Streams Cost Structure
- ✓ Consequences of the network

Problem Statement:

A problem statement is intended to find problems with network connectivity, team productivity, cyber security, etc. With a clear problem statement, the IT team will be aligned with what issue they're solving. This way, all discussions of potential solutions stay on track.

PROBLEM STATEMENT WORKSHEET		
WHO: Who it impacts. Team members, and other stakeholders to focus on the problem, It should create awareness and stimulate creative thinking.	WHAT: Impact is the extent of the negative consequences that a problem can cause to the business, the customers, or the users. Impact can be measured in terms of financial loss, customer satisfaction.	WHY: It provides a clear and concise roadmap for the research, and helps to ensure that the research is well-designed and addresses a significant and relevant issue.
WHERE: It can cause you to face issues like delays in the delivery of the products on time, problems with quality, reorganizing marketing campaigns and budget overruns.	WHEN: As obvious as it seems, identifying the problem is the first step in the problem-solving process. Pinpointing a problem at the beginning of the process will guide your research, collaboration, and solutions in the right direction.	HOW: Identify Root Cause of the Problem, Develop and Execute the action plan of the issues.

Our Strategy

Our Software development strategy is a combination of decisions made upfront that enables you to create a useful list of dos, don'ts, and shows for the design, development, and deployment of future applications and proceeds steadily through each stage of a development project.

Our five business strategies: cost, quality, distribution, technology, and intellectual property (IP)

Our Services

Currently we are providing services to globally recognized clients from last 9+ years. Some of our applications works in 26 languages
