

LabelNest

Data That Teaches Machines Right

Who We Are

LabelNest is a data operations and AI-support and data infrastructure company building **India's data backbone**.

We transform messy, unstructured public information into **clean, verified datasets** that power analytics, research, and machine learning.

Our ecosystem blends human expertise and automation — delivering data that teaches machines right.

Why LabelNest

Because “One size doesn’t fit all”, and we build data that fits your world.

❑ Founded by Ankit Suman, with the belief that one size doesn’t fit all in data.

- 20+ core team members driving India's data backbone with precision and purpose.
- 200+ expert data specialists enabling scalable, on-demand operations across domains.
- A hybrid workforce model that can expand to 1,000+ professionals within a week.
- India-first pricing, global-grade quality - affordability without compromise.
- Empowering untapped talent from Tier 2 & Tier 3 cities to power the world's data future.
- Modular flexible ecosystem: from labeling to intelligence
