PRODUCT SOLUTIONS

The productized solutions enable customers to implement the solution faster and more efficiently, taking full advantage of the product's enhanced features.

GoVal helps for pharma and other life science companies to digitize their paper-based, manual process and achieve 100% paperless and fulfill regulatory compliances from FDA, EMA.

Work-In-Progress (WIP) and Traceability solutions for the manufacturing industry use Automatic Identification and Data Capture (AIDC) methods. These solutions can be extended to achieve Industry 4.0, leading to the realization of a Smart Factory.

Manufacturing Quality control through Statistical Process Control (SPC)

Animal Colony Management System (ACMS) helps animal facilities of research labs, pharma companies to maintain their animal inventory & tracking.

Our approach to project execution and delivery of Software Projects

- ❑ **Software Development Methodology:** V-Process, Agile way of doing – iterative development.
 - ❑ **Code Quality:** Ensured through usage of industry-standard frameworks, coding standards, inspections/reviews
 - ❑ **App. Security:** Adherence to industry-standard practices for application security, including JWT and VAPT assessments before delivery.
 - ❑ **Version Control:** Utilizes Bitbucket with separate branches for customers opting for customization, providing efficient code branching and merging.
 - ❑ **Quality Control:** Reviews, unit/system level testing to ensure application quality.
 - ❑ **User Acceptance:** UAT, VoC through periodic Reviews & Feedback from customer.
 - ❑ **Deployment & Go-Live:** Managed through a release management procedure, Production Acceptance Testing(PAT).
 - ❑ **Post-Implementation Support:** Warranty and ongoing support are provided.
 - ❑ **Application Support & Maintenance:** Includes help desk and SLA-based support., Change Requests to enhance application functionality.
