

Sensegood Moisture Meters:

- ✓ High frequency moisture sensing technology developed in collaboration with **USDA – US Department of Agriculture**
- ✓ Sensegood Moisture Meters can even detect the bound (inner) moisture, and not just the surface moisture
- ✓ Can measure from very low to very high moisture ranges: 3% to 40% with 0.1% resolution
- ✓ Portable, Small size, Latest Bluetooth Low Energy (BLE) enabled: moisture result directly comes to the mobile phone app
- ✓ Internal temperature compensations in moisture readings for various weather conditions

Stall A1

Sensegood Coffee Roast Analyzers: AGTRON Analyzers:

- ✓ Works as per the guidelines set by **SCAA – Specialty Coffee Association of America**
- ✓ Coffee Roast Analysis – **AGTRON Commercial and Gourmet, Probat Colorette, ColorTrack** – All-in-one measurement along with the type of roast (City, Full City, etc.)
- ✓ Roast Color/Appearance Difference – Color Matching – Color Consistency Analysis – Color Quality Control – Color Management for product production consistency
- ✓ **Works with any sample**; Coffee beans, Coffee powder, Instant premix powder, Chicory powder, Tea (CTC/Herbal), or Liquid samples
- ✓ Ensure the ingredient proportion consistency using Sensegood Spectrophotometers
- ✓ Large viewing area + Rotating sample platform + Averaging = **Accurate reliable results**
- ✓ **World's most affordable** yet technologically advanced instruments – **Patented technology**

Patented Robust Reliable Technology	World's Most Affordable	Original Equipment Manufacturer	World Wide Supply	Easy to Operate	Color Touch Display	Light Weight	No Warm Up Time	No Field Maintenance Cost	Large Viewing Area	Data Portability

COLOR MATCH		COLOR MATCH
