

TANACET: Strategic Solutions for a Dynamic Digital Landscape

About Tanacet

A dedicated partner delivering transformative software and strategic services. We co-own your success by providing long-term value and scalability. www.tanacet.com

About Eduglobez

Focused on continuous education and talent transformation to future-proof employees and organizations. www.eduglobez.com

Our Vision

Empowering businesses and organizations with advanced software solutions that drive **efficiency and growth**, transforming challenges into opportunities for success.

Executive Summary

Driving transformation through technology, quality, and leadership.

Strategic Technical Vision

Aligning **strategic technical vision** with P&L goals and business growth.

Product Engineering

Modernizing platforms for velocity, scalable architectures, and next-gen products.

Quality-First & Sustainability

Ensuring **sustainability** through Quality-First principles and best practices.

Strategic Excellence

Providing **Tech advisory, innovation**, and strategic guidance for security and growth.

Technology Leadership & Culture

Expertise in AI automation and cloud maturity. Evolving SaaS to modern architecture and fostering engineering excellence.

High-Quality Software Services

Faster Features, Infinite Scale and **AI-driven intelligence** into your product.

Accelerated Product Engineering

Platform Modernization

Transform legacy systems into **cloud-native architectures** for exponential growth.

AI & GenAI Integration

Integrate AI for **intelligent features** and automation, driving market advantage.

Integrated Quality Engineering

Implement **shift-left QA** for zero-defect releases and lower support costs.

Hyper-Efficient Execution

Cloud Maturity & DevSecOps

Streamlining deployment with **CI/CD** for optimized cloud cost and security.

Mission-Critical Reliability

Engineer high-availability platforms **for 99.99%+ uptime.**

Custom Software Development

Deliver custom software solutions from concept to launch with agile teams.

Strategic Co-Ownership and Leadership

Ensure architectural stability, team growth, and **predictable delivery**.

Governance & Risk Management

Transparent Governance

Clear methodologies for oversight and **predictable delivery metrics**.

De-Risked Architectural Reviews

Proactive identification & mitigation of high-impact technical risks for **resilient platform**.

Security & Compliance

Embedding SecOps for regulatory **compliance & strategic guidance**.

Technical Leadership

Talent Scaling

Rapid **scaling of high-performance teams**, with aligned skill sets.

Executive Advisory

Fractional CTO expertise for technical roadmap & Board Reporting.

Culture and Mentorship

Instilling **engineering excellence** & mentorship for world-class architects.

GCC As a Service: The Lean COPO Model

Achieve efficiency & control with our **COPO** model.

40%

More Efficient

< 120

Day Launch

100%

IP Control

OpEx

Structure

Traditional Model

- **CapEx Heavy:** Massive upfront costs.
- **Slow Time-to-Market:** 9-12 months.
- **High Operational Burden:** Drains management focus.
- **Loss of Control:** Outsourcing risks.

COPO Benefits

- **Lean & OpEx:** Reduced costs.
- **Short time to launch:** 4 months.
- **More Efficient:** Optimized operations.
- **Full Control:** Maintain strategic oversight.

COPO Criteria

- **De-risked Talent:** Rapid access, low attrition.
- **Plug-and-play Infra:** Immediate secure setup.
- **Focus on core:** Leadership focuses on Business.
- **Complete Transparency:** Operational visibility.

GCC Expansion: Zero Setup, Zero Risk

Launch your global engineering hub in **120 days** with complete control and zero operational burden.

Instant Elite Engineering Teams

Pre-vetted talent pool with **high retention rates**. We handle all HR, payroll, and compliance, ensuring your teams stay focused on **building great products**.

Ready-to-Code Infrastructure

Skip months of setup. Get **secure workspace and enterprise IT** from Day 1. No real estate costs, no setup delays—just **start coding**.

Simple Monthly Operations

Forget complex regulations and entity management. We handle everything while you **maintain full IP control**. Pure focus on your **product and strategy**.

Engineering Excellence Academy

Transform engineers into tech leaders. Build tomorrow's architects today.

Immediate Business Impact

- **Speed to Market:** Modern DevSecOps practices cut deployment time by 60%.
- **Elite Teams:** Personalized growth paths boost retention and performance.
- **Quality First:** Zero-defect culture through test automation mastery.
- **Future Skills:** Expertise in GenAI and Cloud-Maturity.

Strategic Skills Pipeline

- **Scale & Resilience:** Master high-availability cloud architecture.
- **AI Integration:** Build and deploy production-grade ML systems.
- **Code Excellence:** Transform legacy systems into modern platforms.
- **Tech Leadership:** Mentor future architects and tech leads.

Transforming talent today to build the engineering leaders of tomorrow.

Virtual CTO: The Startup's Strategic Co-Pilot

Gain **senior technology leadership** on demand, perfectly timed for your growth stage, without the salary cap-ex.

Growth Strategy & Scaling

Define a **3-12 month technical runway** aligned with seed/Series A goals.

Transform your MVP into a scalable, enterprise-ready platform.

Technical Debt & FinOps Control

Clean up technical debt that slows feature velocity.

Optimize cloud costs (FinOps) to extend runway and boost investor confidence.

Team & Process Maturity

Provide **executive-level mentorship** to tech leads. Establish DevSecOps processes and prepare for rapid expansion.

Get **CTO expertise on demand** for strategic guidance, architecture reviews, and board reporting.
