INDUSTRY EXPERIENCE

BUSINESS MODEL

EFFORT BASED

Time and Material Model is an appropriate option; when the scope and specifications of a project are difficult to lockdown. This model is particularly useful in handling complex projects.

FIXED PRICE

Fixed Price Model offers customers a low-risk option. Fixed Price Model can be implemented when the scope and specifications of a project are reasonably clear.

OFF-SHORE

Offshore Development Centre (ODC) Model is ideal for customers looking to build a long term relationship. This ODC is most suited for tasks that require outsourcing.

ON-SITE

Onsite model is perfect for short-term projects. Customers choose Onsite model primarily for re-engineering projects with a repetitive scope of work.

OUR PRODUCTS

iNoble Stock pro

Our specialized Stock Management System is tailored for packaging solutions, complete with an integrated attendance module. Seamlessly track and manage packaging materials, inventory levels, and orders with precision and efficiency. Our system streamlines stock operations while providing real-time insights into usage and availability. Plus, with the attendance module, effortlessly monitor employee presence and streamline workforce management.

Inventory Management System

We created CRM software designed to streamline the management of daily business records, including purchases, sales, clients, vendors, stock items, and accounts. The software incorporates various features such as role-based access control, GST verification, and automatic retrieval of details when adding clients or vendors. Additionally, it offers integration with SMS, WhatsApp Business, email functionality, and generates reports in both Excel and PDF formats.
