ABOUT DALFIN

Dalfin by BrainTip AI is a revolutionary AI-powered software development platform designed to make custom application building accessible to everyone. As the world's first no-code platform capable of creating fully customisable SaaS applications in under 60 seconds, Dalfin empowers users by transforming requirements into functional applications instantly through voice or text input.

The platform offers versatile solutions, whether in the cloud or on-premise, and supports 30 languages to ensure that users can develop software in their preferred language. Dalfin addresses digital transformation needs across sectors by combining speed, cost efficiency, and ease of use.

CORE FEATURES

AI-Powered No-Code Development

Build applications instantly without writing a single line of code. Dalfin's AI models interpret user input, transforming requirements into sophisticated software solutions.

Multilingual Support

With support for 30 languages, Dalfin allows global teams to work seamlessly, bridging language barriers in software development.

Customisable Deployments

Choose cloud-based or on-premise implementation options, allowing organisations to retain complete control over data and infrastructure.

Advanced Automation

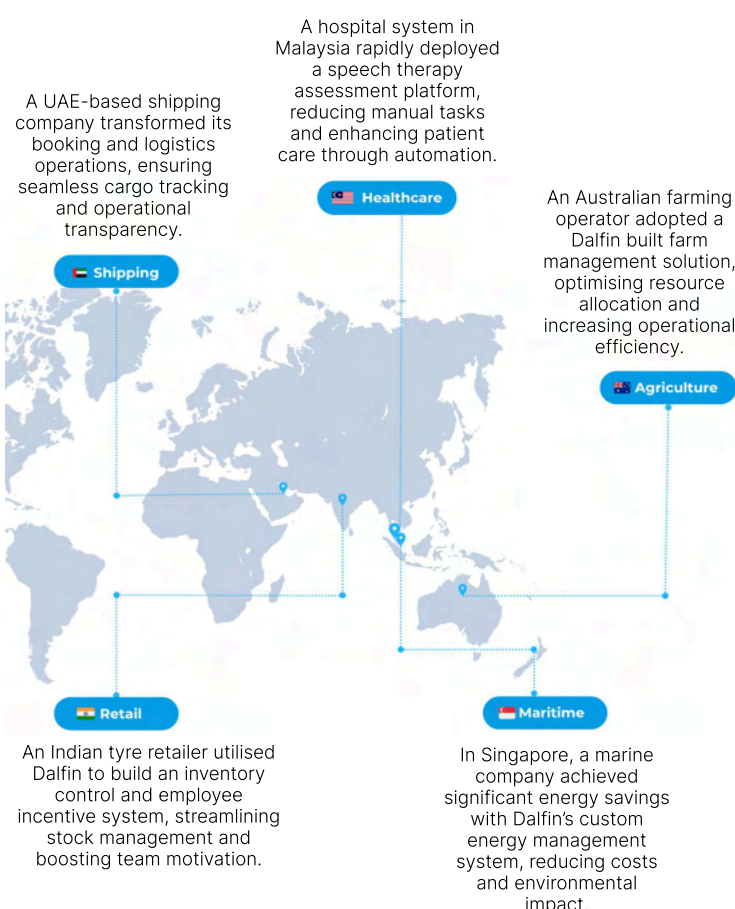

From automating workflows to creating intelligent processes, Dalfin's AI capabilities streamline operations and maximise productivity.

Enterprise-Grade Security

Designed with security and compliance in mind, Dalfin ensures that data is protected while adhering to industry standards.

SUCCESS STORIES

Dalfin has empowered organisations across various sectors by delivering innovative, no-code solutions tailored to their unique needs:

Ready to revolutionise your software development

90% Faster Development Time

Dalfin reduces traditional software development timelines by up to 90%, empowering businesses to launch applications in record time.

30 Languages Supported

Break language barriers with multilingual support, allowing users worldwide to develop applications in their preferred language.

65% Cost Savings

By eliminating coding and streamlining workflows, Dalfin offers up to 65% savings on development costs.

Chosen by forward-thinking organisations worldwide

Companies across sectors such as healthcare, finance, retail, and agriculture rely on Dalfin to drive digital transformation and streamline their operations.

60-Second No-Code App Builder

From concept to deployment in under a minute—Dalfin allows users to create customizable apps instantly.

Complete On-Premise or Cloud Flexibility

Secure, scalable solutions with full control, offering both cloud and on-premise deployment options to suit enterprise needs.
