

Liya.AI™ is pioneering a new era of employee well-being. We are a Hybrid Employee Assistance Platform that reimagines how organizations support their people by seamlessly blending the simplicity of AI with the wisdom of licensed human therapists.

We built our platform to close the critical gap between widespread employee stress and the low utilization of traditional mental health services. Our AI coaches serve as a private, on-demand starting point for daily challenges, while our human therapists provide a compassionate safety net for deeper, critical care.

Beyond individual support, our platform empowers leaders with a real-time, anonymized view of their organizational health, enabling them to make proactive, data-driven decisions that build a resilient and engaged culture.

Liya.AI™ is for CEOs, Founders, and HR Leaders who understand that investing in employee well-being is more than a benefit: it's the foundation for a thriving workforce.

The result is a direct impact on your business:

- Reduced Attrition & Absenteeism
- Improved Productivity & Engagement
- A Culture of Trust & Psychological Safety

Partner with us to create a workplace where every employee feels valued and empowered to thrive.
