BIOSTIMULANTS FOR SUSTAINABLE AGRICULTURE

Dr. VADIVUKKARASI PONNUSAMY

Features of MetSym

- Crop-specific, native, and multifunctional biostimulant for rhizomatous spices cultivation (*Zingiber officinale*)
- Symbiotic and sustainable plant nutrient
- Cost-effective liquid bacterial formulation
- It facilitates better growth rate and nutrient uptake, resulting in stronger, more stable crops, and disease resistance through various stages of ginger farming.

Farmer Benefits

- One product for multiple problems
- Ensures more productivity with better quality at a lower cost
- Better quality of life for the farmers by doubling their annual income
