# OUR STORY

ITTStar Global Services Pvt. Ltd, specializes in combining technology with business acumen, allowing us to achieve tangible results that are aligned with essential business KPIs. We specialize in building and maintaining secure, flexible, and scalable cloud-based solutions for our customers with cost effective consulting expertise. Our priority is to reduce cost & significantly improve the way our customers make cloud strategies to optimize their productivity & IT operations

## Generative AI Services

ITTStar provides a cutting-edge Generative AI platform tailored to your business needs, combining advanced computing and AI software for seamless model building, customization, and deployment.

## Cloud Assessment, Advisory, and Transformation

Our cloud experts will help align cloud & business strategies and conduct ROI/TCO analysis. We will work closely with the business by recommending tools, best practices & create detailed roadmaps with 'To-Be' solutions.

## App Modernization (Serverless & Containerization)

Modernizing business applications is essential. Serverless computing manages servers for you, while container platforms streamline application management, reducing infrastructure footprint and enhancing availability.

## DevOps

**Develop a strategic DevOps roadmap for agile deployment:** Enable continuous infrastructure deployment in minutes to accelerate time-to-market and prevent failed launches. Automate builds and deployments to boost operational efficiency and free up IT resources.

## Migration & Deployment

### AGILE & INCREMENTAL

Applications are moved into smaller units of work, allowing easy adjustments to the approach and avoiding a large planning phase.

### CONSISTENT

Full assurance that the infrastructure and applications are consistent between stages of development, QA, staging, and production.

### ROI DRIVEN

The Full value of the cloud is optimized to maximize efficiency and drive ROI through enhancements alongside the migration.

## Managed Services

- 24x7 monitoring with stringent SLAs
- Focus on keeping Cloud security with regular audits
- Continuous optimization
- Business continuity and disaster recovery
