# Solutions We Offer

## Market Research

We conduct market research tests and utilize large volumes of relevant data and convert it into usable information that is suitable for your business needs.

## Engaging Surveys

We build custom surveys and also handle complex logics. We develop the high level technology interface for both online and offline surveys.

## Peoples Voice

We get accurate information by right people filtering with validated response is highest priority in our proprietary panel.

## Analytics

We spend endless hours of converting big data and raw data to create a systematic and simplified data system that can fulfil your requirements

## Business Consulting

We help you convert raw ideas to create practical action plans for a whole new and improved business model.

# Methodology

## Qualitative

- Allowing right target group of people to discuss in a forum to understand the behaviour and expectation of end users.
- Handle in-depth interviews, focus groups, observation methods, ethnographic research etc.
- Listen, moderate, record, transcribe, and prepare reports with the content analysis including summary and recommendation.
- • •

## Quantitative

- In a new era of technology, data collection through online method has the highest rate of response. We design and collect data with right respondents
- Speak to people with the systematic designed instrument in-person or through phone or web based platforms
- Quality data collection, tabulating the inputs and statistical analysis will give right direction for the solutions.

## Library Research

- Extract the open source reports and conglomerating them with respect to identify the market scenario.
- Analyse the multiple reports and come up with the conclusion as per the clients objective.
- Generate and upgrade the reports with latest trends with customized layout.

# Our Forte

Virabh advises research methodologies that benefit your business the most. We take into account your budget, the available timeline to-go-to-market, and other pre-identified restrictions like target segment and location.
