Framework material	Hard pressed extruded aluminium 6061/T6 (15HW)
Cover material	PVC-coated polyester textile flame retardant to DIN 4102 B1, M2, CFM, 850gsm

PAGODAS

Pagoda structures provide the means to create eye-catching tensile roof structures. Together with ease of assembly and perfect build-quality, the Pagoda tents provides the perfect solution for a vast range of applications. Pagodas create an ideal solution for reception areas or can be joined together by the use of integrated rain gutters, which enables the formation of multiple configurations enhancing the visual impact of any event with a touch of elegance whatever the location.

Our pagoda tents come complete with lightweight, aluminium for a solid and secure installation. The hard-wearing roof canvas and sidewalls are made from high-grade PVC or polyester with a PVC coating, providing an attractive shelter that is waterproof, fire retardant and UV resistant too.

Item	Specification
Width	5m
Eave height	2.5m
Ridge height	5.43m
Wind loading	80km/hour 0.3kn/m ²
Framework material	Hard pressed extruded aluminium 6061/T6 (15HW)
