

TRANSFORMING DRUG DISCOVERY WITH CUTTING-EDGE CELLULAR TECHNOLOGIES

What if your next discovery could move faster, with greater confidence?

The challenges you face

- Will your preclinical models truly predict human response ?
- Can you trust your data quality for regulatory submissions?
- Are you losing momentum to gaps in your capabilities?
- What about that rare disease target with no existing models?

At Yashraj Biotechnology, we've built our capabilities around one question:

What do you need to win?

From novel therapeutics to breakthrough ingredients, we deliver the cellular technologies and scientific partnerships that accelerate your timelines and strengthen your data.

Solutions designed for your success

iPSC-Derived Cell Line Generation & Characterization

Make confident go/no-go decisions earlier and reduce late-stage failures with disease models that truly replicate human biology.

1

Primary Hair, Skin Cell Isolation & Co-Culture for Cosmetic Research

Meet regulatory expectations while giving your R&D team the predictive power of authentic human skin architecture.

2

Custom Assay Development for Preclinical Discovery

Accelerate screening, validate your target and receive fully optimized protocols ready to integrate into your workflow immediately.

3

Gene Editing Platform for Disease Models

Prove causality with precision-engineered genetics and eliminate confounding variables with isogenic controls.

4

Why leading innovators chose us?

- Results-driven science in a GMP-compliant facility
- ISO-certified quality for regulatory confidence
- Complete solutions under one roof
- Human-relevant insights through advanced high content imaging
- Accelerated timelines with rigorous standards
- Infrastructure that adapts to you

Who thrives with our partnerships?

- Pharmaceutical & Biotech Companies advancing novel therapeutics
- Cosmetic & Personal Care Leaders developing next-generation products
- Contract Research Organizations expanding specialized capabilities
- Academic Researchers translating discoveries toward clinical impact
- Medical Device Innovators requiring human cell-based validation

What happens next?

Discovery call

Share your challenge. We'll explore how our platforms can accelerate your goals.

Custom proposal

Receive a tailored solution with clear timelines, deliverables, and investment.

Collaborative execution

Work with scientists who care about your success as much as you do.

Results that move you forward

Get validated data, documented processes, and insights that strengthen your program.
