

WORLD'S FIRST DIGITAL REAL ESTATE ECOSYSTEM

A SaaS based ecosystem for real estate stakeholders that modernizes project execution, material procurement, site management, office management, CRM and project marketing, all in one seamless platform.

All in a beautifully integrated experience designed for scale at which makes it suitable for maximum adoption.

Each node represents a specialized product built for key stakeholders.

BRICKO ERP & CRM

Core Operating System for Real Estate Projects

Digitizing every aspect of construction—from planning to procurement to people—on a unified platform.

Key Highlights:

- Projects: Manage WBS, BOQ, Work Orders, and DPR with real-time tracking.
- Procurement: From Indents to GRNs—automated workflows reduce leakage and delays.
- Finance: Budgeting, Invoicing, Payments, and Journals aligned to project performance.
- Legal & Compliance: Land, Court Cases, and generation of RERA-friendly reports like Sold/Unsold.
- People: Integrated Attendance, Payroll, and HRMS to manage site and office staff.
- Custom Approval Workflows & Role-based Dashboards for all stakeholders.

The image displays the BRICKO ERP & CRM system across two devices. On the left is a smartphone showing the mobile application's home screen. It features a header with the BRICKO logo and user profile, followed by sections for Pending Tasks (24), Pending Approvals (24), Today's Tasks (24), and Today's Tasks (24). Below these are 'Quick Create' buttons for Invoice, Task, Lead, and Expense, and a 'Go to workspace' section with icons for Material, Site Work, Sales & CRM, and Legal. A 'Projects' section shows a thumbnail of a building. On the right is a tablet displaying the desktop dashboard. The dashboard has a header with the company name 'Pioneer Infrastructures PVT LTD'. It includes a sidebar with links to Dashboard, Tasks, Requests, Projects, Files, Messages, Contacts, and various departmental sections like Material, Site work, Sales & CRM, Legal, Employees, and Finance & Accounting. The main area features several cards: 'Pending Tasks' (32), 'Deliveries today' (2), 'Sales Report' (based on the selected period), and 'Monthly inventory movement' (based on the selected period). At the bottom, there are sections for 'App Chat' (with messages from Alcides Antonio, Marcus Finn, Carson Darin, and Fran Perez) and 'Pending Tasks' (Meeting with Partners, Interview with Jonas, Doctor's appointment).

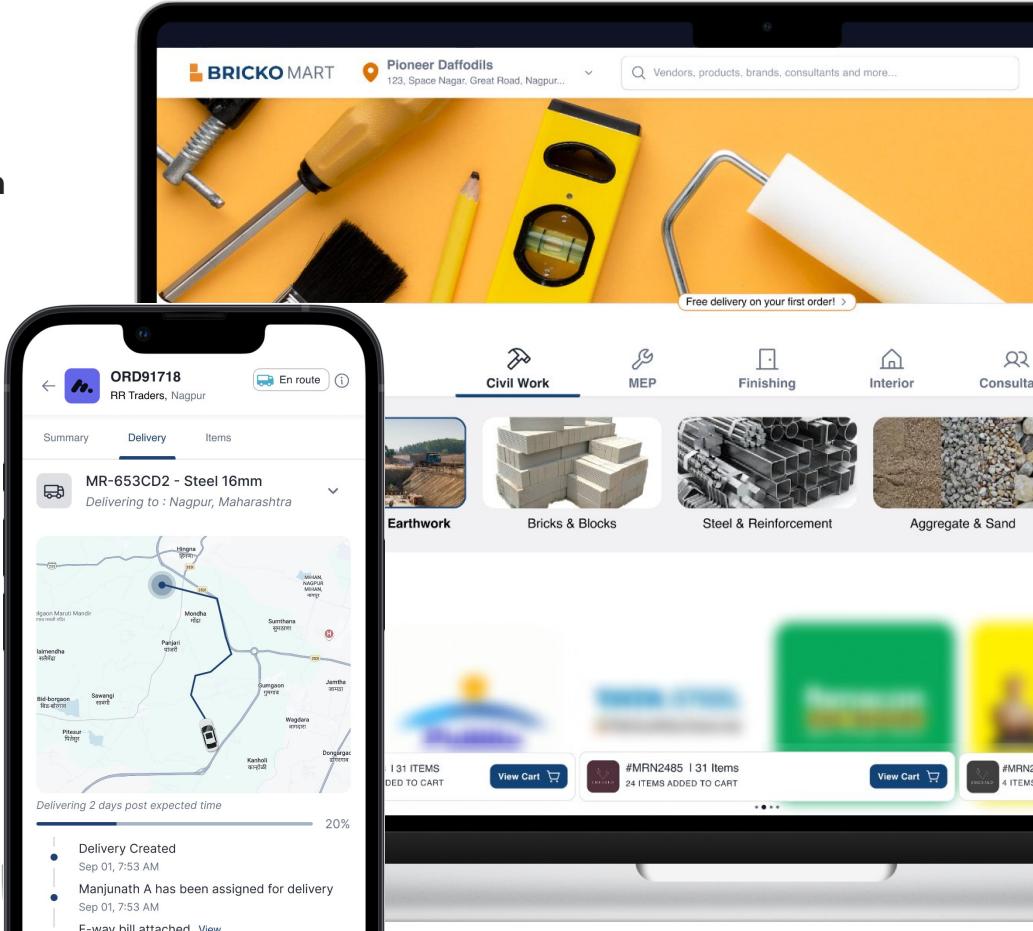

Procurement Engine for Construction Ecosystem

Bringing together verified vendors, project requirements, logistics, and payments-on one seamless platform.

Key Highlights:

- Smart Matching: Builders post RFQs, vendors respond via Quotes.
- Purchase Orders quoted prices with multiple deliveries & Goods Receipt tracking.
- Vendor Profiles with catalogues, ratings, compliance docs, and lead tracking.
- Logistics: Integrated Driver App for real-time delivery visibility.
- Sales Management for Vendors: Manage RFQ's, auto-generated quotations, catalogues, promotions, orders and so much more.
- Dealer/ Distributor management for corporate brands

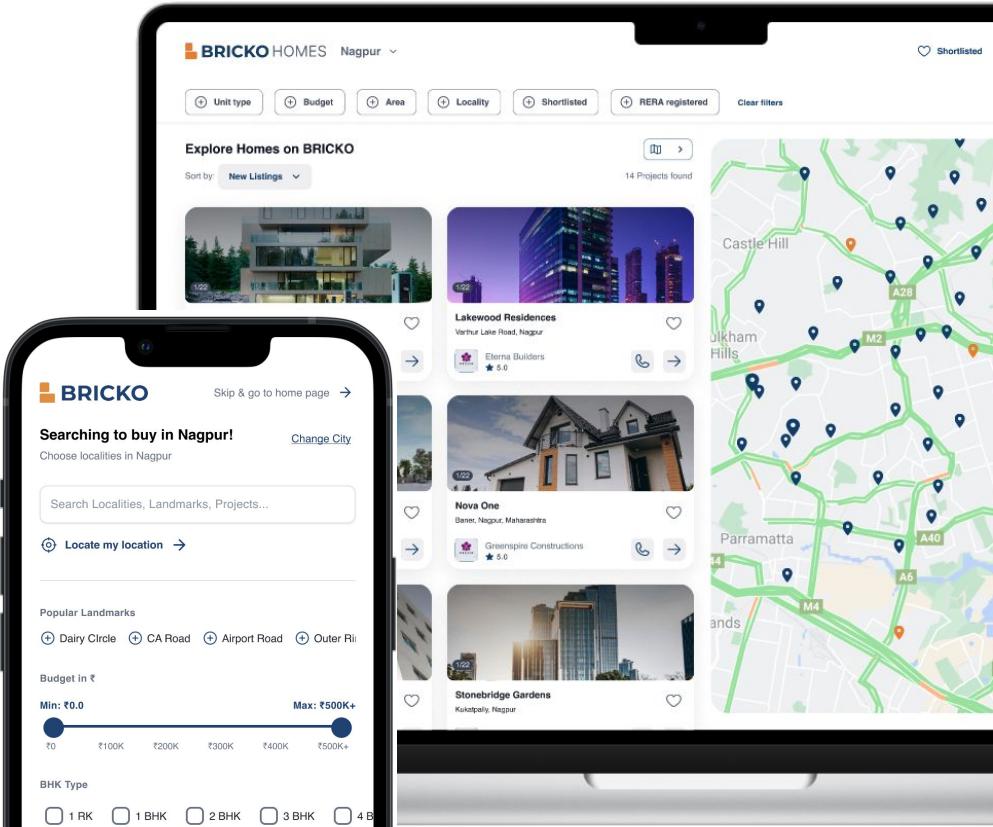

Project Discovery & Buyer's Platform

A new-home exclusive experience that connects verified projects, loan options, and real-time updates for buyers.

Key Highlights:

- Verified Projects only, listed directly by builders (no resales, no brokers).
- Transfer of bills and warranty cards from Marketplace to ERP to Home Buyer.
- Smart Comparison, loan calculator, and bank integrations.
- Buyer Dashboard: Track construction progress, documents, payments, and queries.
- Lead to Ownership Journey fully digitized with CRM touchpoints.
- RERA-aligned for authenticity and builder accountability.
