

# The industry standard for verified credentials

Verix enables organizations to issue, manage and verify digital certificates, badges or awards. Build trust and authenticity for the achievements you honor.

## Case Study

### Amdocs

In an exclusive partnership, Amdocs offered globally verifiable certificates of individual excellence and innovation to its employees.

## About our technology

Everything built on Verix is permanent, secure and globally verifiable. Verix uses a blockchain based open-badge standard accepted worldwide and integrates with GDPR/CCPA compliant partners.

## Create with ease

Choose a template, create your own, or use AI to make and launch in seconds.

## Customize to your brand

Bring your credentials to life — add your logo, colors and fonts. Upload images, animations or videos. Whatever you imagine, you can create.

## Include engaging rewards

Give your recipients something more than recognition. Unlock exclusive content, custom videos, coupons, or access to private communities with every credential.

## Effortlessly share and print

Design your credentials for both online and offline use with print friendly templates. Recipients can also seamlessly post these to social media platforms with our deep integration.

## Get comprehensive real time data

See who is redeeming credentials and adding them to LinkedIn and beyond.

## Minimize costs

Cut expenses and time associated with shipping, distribution, and administration.

## About us

In a world where fake credentials fuel a billion-dollar industry, authentication and verification are more essential than ever. Verix uses blockchain and GenAI to verify skills, certifications, votes, tickets, products, and content.

## Our partners

We are trusted by 200+ enterprises/organizations and 200K+ users globally.
