

# LiveBench - Instant Access to REAL Hardware

Cloud Based Remote Lab for Faster Design Cycles

# Challenges in Electronic Component Discovery

Navigating the Electronics Discovery Maze

## Challenges in Eco-System

Lengthy Setup and Configuration Times

Inconsistent or Incomplete Documentation

Procurement Delays

High Dependency on (FAE) Support

## Results In

Extended Project Timelines

Increased Development Costs

Missed Innovation Opportunities

## Need for an Integrated Discovery Solution

- Streamline the design evaluation process
- Reduce reliance on physical labs and EVKs
- Accelerate time-to-market.

# How TenXer Labs Helps System Design Engineers

Live, remote labs with real hardware - accessible 24/7

## ● Empowers System Design Engineers ●

Remote Access to Real Hardware

Simultaneous Access to Multiple ICs and Components

Reduced Time and Resource Investment

## The **Salesforce Moment** in Electronics Design Validation

## ● Do More with LiveBench ●

Faster IC Exploration and Evaluation Cycles

Seamless Collaboration and Shared Insights

Scalability and Cost Efficiency

Reduced Support Dependency

Data-Driven Insights and Analytics

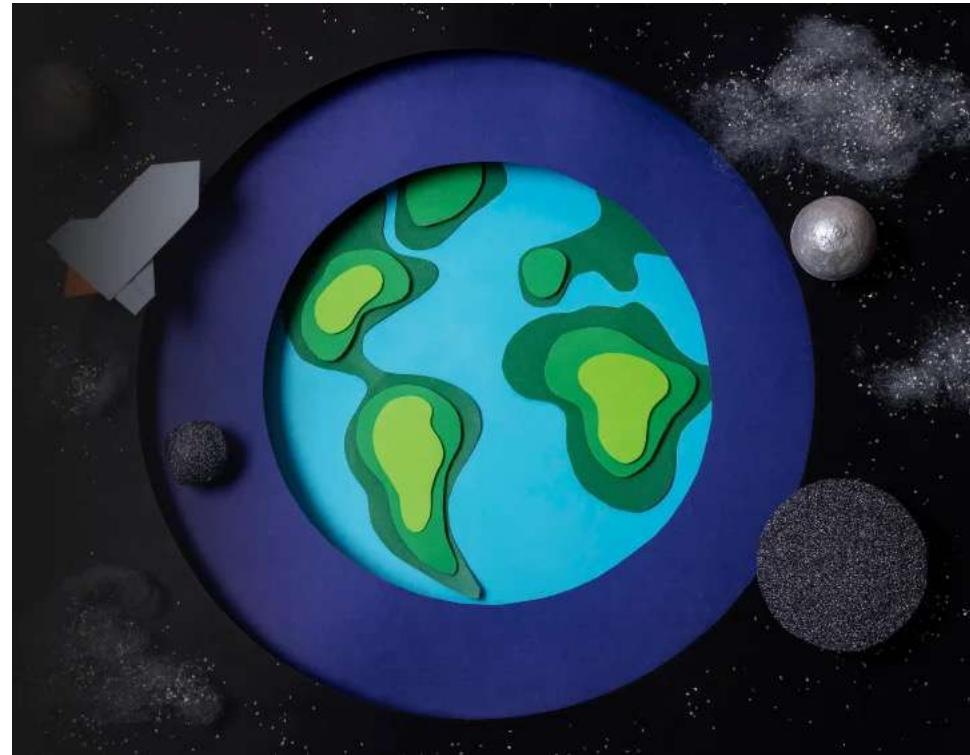

# Introducing LiveBench

Digitalizing IC Exploration and Evaluation

# Saving the Planet with LiveBench

- Chipmakers who embrace and promote cloud-based access to Evaluation Kits (EVKs) and Development Kits (DVKs) through LiveBench eliminate the need for physical evaluation kits and board production for each customer, reducing e-waste and associated carbon footprint.

**62.4 million metric tons**  
of **E-waste** gets generated globally.

# Lab Launch **CN328 - 100W Power Supply with Multi-Output**

# About Us

- Tenxer was founded in 2016 and backed by investment from [Silicon Valley Quad](#)
- Focused on enabling evaluation of Integrated Circuits (ICs) and electronic sub-systems through its web platform

10,000+ Active Users

40% from Japan, 20% from USA,  
40% ROW

70+ Designed Deployed to  
Livebench
