🌐 FlintLab Company Profile

Company Name: FlintLab Inc.

Flagship Platform: FlintLab Sirius 1.0

Founded By: Krishna Seerapu and Jinesh M D

Launch Date: August 01, 2024

Locations: Seattle, WA, USA | Visakhapatnam, Andhra Pradesh, India

Contact: flints@flintlab.io | +1-(802)-FLINTIO

About FlintLab

FlintLab is a next-generation Infrastructure Platform-as-a-Service (IPaaS) that empowers engineering teams to test, automate, and release software with confidence. Our flagship platform, **FlintLab Sirius**, unifies real, emulated, and containerized devices into a seamless orchestration layer — accelerating development cycles, expanding test coverage, and ensuring reliability across every device, OS, and environment.

Mission & Vision

- **Mission**: To provide comprehensive, state-of-the-art testing services that ensure flawless performance of software applications across all platforms.
- **Vision**: To enable every product and service organization to build software that is **#EasyToUse**, **#HardToBreak**, and **#LaunchSecure&Faster**, transforming how technology enhances global user experiences.

Platform Highlights

- **Device Nexus**: Access to real devices, emulators, and simulators via public cloud or private deployment.
- **Test Execution Environment Containers**: Pre-configured, isolated setups tailored to customer needs.
- **AI-Assisted Testing & Observability**: Real-time dashboards, root cause analysis, anomaly detection, and visual trend tracking, predictive analytics, automated regression detection.

Strategic Partnerships

- **Genymotion** – Virtual device infrastructure

- **ShiftLeft** – Security testing and compliance

Use Cases & Industries

- Mobile and web application testing
- B2B testing companies who are in need of device infrastructure
- CI/CD integration, DevOps pipelines

Roadmap & Future Vision

FlintLab Sirius is evolving into an **Autonomous Test Quality Engineering Platform** powered by AI and ML. Future capabilities include:

- Auto-generated test cases and execution
- Real-user behavior simulation
- Seamless CI/CD validation
- Historical learning and failure prediction
- Intelligent test selection and cost-efficient execution

Leadership & Team

Founded by **Krishna Seerapu** and **Jinesh M D**, FlintLab is led by a visionary team of engineers, product strategists, and testing experts committed to transforming the software quality landscape. Our culture emphasizes innovation, precision, and global impact.

Call to Action

We invite summit attendees to explore partnerships, pilot programs, and investment opportunities. Let's build the future of software testing — together
