## Cloud Repatriation considered seriously in the industry and so is the adoption of Cloud Native Computing

FIGURE 20. Barclays CIO Survey – Percentage of Respondents Planning to Move Workloads Back on to Private Cloud / On-Premise from Public Cloud

	1H18	1H19	2H19	1H20	2H20	1H21	2H21	1H22	2H22	1H23	2H23	1H24
Not planning repatriation	37	41	38	45	43	49	31	40	28	30	25	17
Planning repatriation	63	59	62	55	57	51	69	60	72	70	75	83

Source: Barclays CIO Survey program.

Cloud Repatriation is a reality in today's business. A recent survey by Barclays found that 83% of enterprises plan to move their workloads back to private cloud from public cloud. This trend shows a significant change in the business world, influenced by various strategic factors.

Cloud Native application market outlook

CAGR of 2023 - 2028
23.7%

MARKET OPPORTUNITY OVER **NEXT 5 YEARS**

5.9 Bn — 2023
17.0 Bn — 2028

Cloud 1.0 is over - future demands more

Enterprises and nations are no longer asking if sovereignty matters. They're asking how fast they can get there. In an era where data jurisdiction equals power, NuboNS delivers a sovereignty-first, AI-native, data-native cloud platform — not just modernizing IT, but re engineering the digital backbone for enterprises and governments.

NNP enables

- Cloud Sovereignty
- Customization with Flexibility
- Integrated & Standardized Development

Perceived Business Benefits

N N P

▲ **Higher ROI** as enterprises adopts Nubo Native Platform as their target private cloud platform.

▼ **Lower TCO** by Modernizing Legacy IT Applications as Cloud Native using Platform capabilities.

▶ **Faster TTM** with rapid Cloud Native Development and Lifecycle Automation using the platform.

$ **API Management** with advanced Monetization and solution Marketplace capabilities
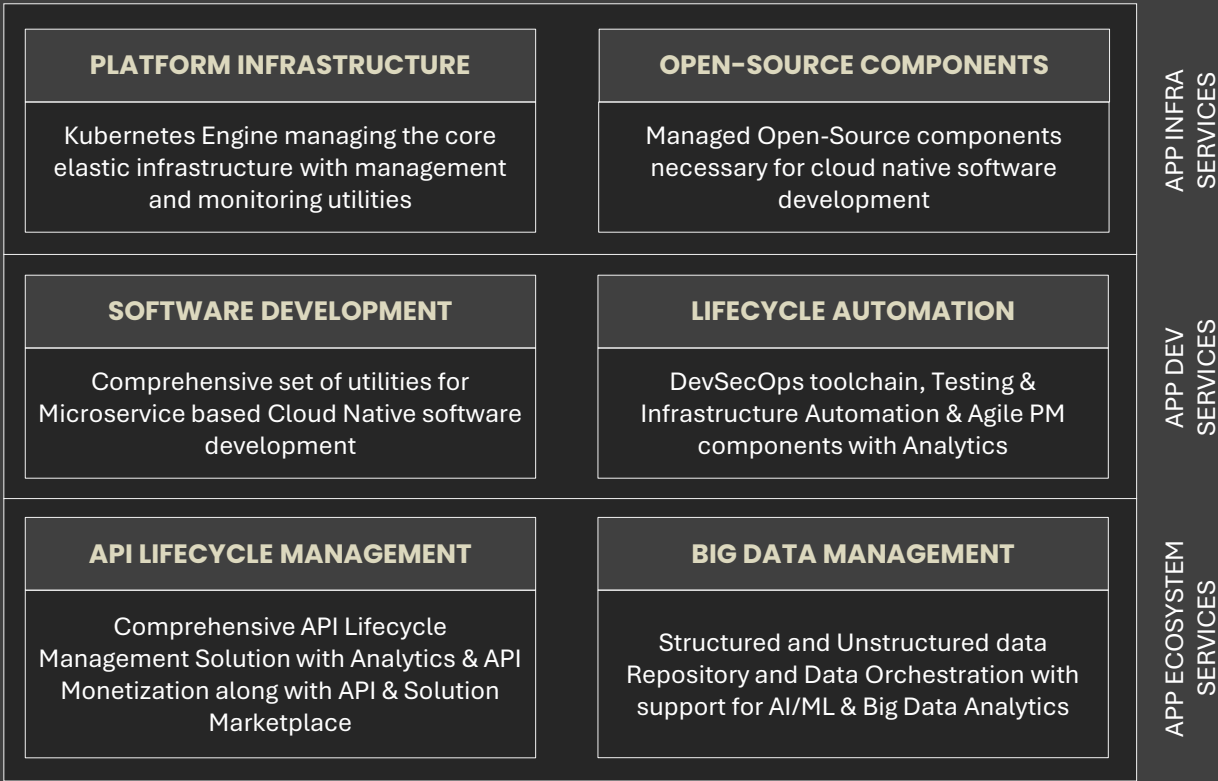

🧠 **Enterprise Big Data Management Platform** enabling Artificial Intelligence & Machine Learning

Construct of Nubo Native Platform
Built for Sovereignty, Ready for Scale

NNP

PLATFORM INFRASTRUCTURE
Kubernetes Engine managing the core elastic infrastructure with management and monitoring utilities

OPEN-SOURCE COMPONENTS
Managed Open-Source components necessary for cloud native software development

SOFTWARE DEVELOPMENT
Comprehensive set of utilities for Microservice based Cloud Native software development

LIFECYCLE AUTOMATION
DevSecOps toolchain, Testing & Infrastructure Automation & Agile PM components with Analytics

API LIFECYCLE MANAGEMENT
Comprehensive API Lifecycle Management Solution with Analytics & API Monetization along with API & Solution Marketplace

BIG DATA MANAGEMENT
Structured and Unstructured data Repository and Data Orchestration with support for AI/ML & Big Data Analytics

Our Offerings

Cloud Native PaaS Offering
A state-of-the-art platform for Cloud Native Software Solution Development with an Enterprise Low Code utility, a comprehensive DevSecOps solution, API Gateway, Solution Marketplace and a rich set of components & AI capabilities required for enterprise scale software solution development and hosting.

Enterprise Cloud Native Platform
Customized version of our Cloud Native Platform for Enterprises enabling Cloud Repatriation, supporting their specific business need and deploy it on the infrastructure of choice including private, public, hybrid options to transform existing legacy IT into a state-of-the-art cloud landscape.

Software Consultancy Services
We provide Cloud Adoption, Migration and Cloud Consultancy Service to define your cloud native journey and long-term IT Roadmap. We also provide professional services to efficiently migrate workloads into our platform and support further development of business use cases and technology requirements.

Why NuboNS

- Cloud Repatriation Ready — tailored private, hybrid, and sovereign cloud deployments
- AI/ML Native — enterprise data enablement and secure model lifecycle management
- Digital Sovereignty by Design — trust-centric architecture for enterprises and governments
- Innovation Pipeline — roadmap aligned to emerging AI regulation, sustainability mandates, and cyber-resilience standards.

NUBONS
NUBO NATIVE SOLUTIONS

In a world where data jurisdiction equals power, NuboNS is building the backbone of tomorrow's sovereign, AI-native cloud.
