AGENTIC SECURITY OPERATIONS

**7-14 DAYS** — Coordination Time
73% TOOLS — Operate in Silos

> "Every security domain—SOC, AppSec, IAM, GRC—responding in parallel. 73% faster. That's multi-layered defense actually working.."
>
> - Ashwath Kumar (Head of Security)
> **Razorpay**

MANUAL OPS IN DAYS

29

3 — Vulnerability Scan
DISCOVERY
Identify new Code Vulnerability and CVE-2026-xxx

2 — Workload Posture
ANALYSIS
Identify criticality of posture violations.

2 — Risk Prioritization
IMPACT
Validate if vulnerable package is imported in code and exploitable

6 — Network Firewalll & WAF
MITIGATION
Identify and enable relevant protection policy

7 — Remediate Code
FIX
Developers remediate and fix code and update vulnerable package

3 — Quality Assurance
VALIDATE
Validate if updated code risk is remediated

6 — Eliminate Risk
DEPLOY
Remediate risk in production environment

ROI & IMPACT REPORT

Security Domains Automated

✓ SOC & Incident Response
✓ Vulnerability Management & AppSec
✓ Identity & Access Management (IAM)
✓ Cloud & Infrastructure Posture
✓ Compliance & Risk Management
✓ IT Operations & SRE

Built for Security Teams

✓ No-code builder + full-code flexibility for any workflow
✓ ChatOps integration (Slack, Teams, native portal)
✓ Human-in-the-loop approval gates on critical actions
✓ Complete audit trail and workflow visibility
✓ Automatic context management

55% Faster Incident Response & Vulnerability Remediation

60% Faster Compliance process.

100+ Cybersecurity & IT Ops Usecases
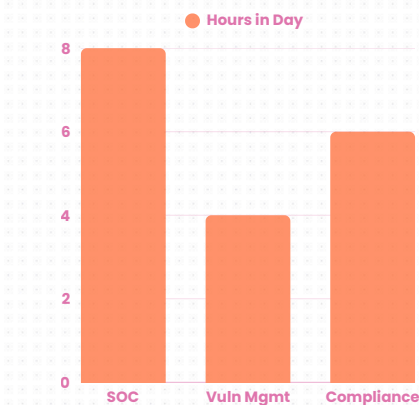

300+ Ready to use workflow Templates

600+ Security & IT tool Integrations

● Hours in Day

(Bar chart: SOC = 8, Vuln Mgmt = 4, Compliance = 6)

● ROI in Months

(Bar chart: Small-Biz ≈ 0.8, Mid-Biz ≈ 3.8, Large Ent ≈ 2.7)

Manual Security Operations: The Hidden Cost

• 8 hours daily on SOC alerts
• 4 hours on vulnerability management
• 6 hours on Compliance & posture management

Security team spends 18 hours/day on repetitive tasks

Benefits of Central platform approach No SIEM, Security tool vendor lock-in. Flexibility to customise Agents that suits your operations need. Power of integrating Bring your own Model in workflow. UpSkill Team: strategic agent building — no more manual work burnout

"From weeks to minutes—autobotAI made our cybersecurity & cloud operations effortless."

- Bharat M (CTO) Grenerobotics

ROI CALCULATION

$$\text{Total Annual Saving} = \text{Technical debt reduction} + \text{Manual Cost reduction} + \text{Incident related cost saving}$$
$$\text{ROI} = \frac{\text{Total Annual Saving} - \text{Agents \& AI Cost}}{\text{Agents \& AI Cost}} \times 100$$
