Inventory system - ERP Software

ERP Software is a comprehensive solution integrating manufacturing, sales, and inventory management for the diamond industry. With robust functionalities, it streamlines operations, facilitates online sales, and offers mobile apps for seamless management and accessibility.

Integrated Manufacturing

This ERP Software excels with its integrated manufacturing module, seamlessly connecting production, sales, and inventory management for a cohesive workflow.

Mobile App Accessibility

Dedicated mobile apps boost accessibility, enabling users to manage manufacturing, sales, and inventory remotely for informed decisions on-the-go.

TechHive

What Our Customers Say About Us

⭐⭐⭐⭐⭐

"Thorough professionals that are ready to go the extra mile. The team was prompt, professional and sincere in their endeavors. The deliverables were punctual and exceeded expectations. Highly Recommended!"

- Tanya K.

⭐⭐⭐⭐⭐

"Thanks, TechHive team for successfully completing our UIUX design for our portal and the website. We are happy with the service they provided and we wanted a design that required multiple iterations but Techhive was really happy to give as many iterations until we were happy with the design. The work quality is remarkable too. Overall I am fully satisfied."

- Luke R.

Upwork

Reviews 250+ • Excellent

⭐⭐⭐⭐⭐

★ ★ ★ ★ ★

TechHive team have been excellent to work with! Every part of the project was delivered timely and on budget. I was beyond impressed by the skills and talent of his team. The UI designers did an amazing job with the Figma wireframes and mockups, and his team of front-end developers delivered a full implementation of the UI that beat all my expectations.

Before starting the project, I was hesitant due to our time zone differences. However, thought the project we had constant communication and standups that I even forgot we were working on different time zones.

I'll work with them again in the future and would highly recommend them for anyone looking for a fantastic team of software engineers."

- Gary L.

"By far, THE BEST freelancer and team I've every worked with in the 100 or so projects I've had on Upwork. Absolutely amazing stellar team. They are absolute perfectionists. They are experts and go above and beyond the norm to deliver perfect products and always exceed expectations. Mitul, is one of the most honest, sharpest, smartest yet easy going and humble people I have ever met or worked with, not just on Upwork. The unique gift of having such extensive knowledge and expertise in all types of technologies, as well as an honest and exceptional management skills that he has is very very hard to come by. I can frankly say, that if you are a big client or a small client and want to have a peace of mind knowing your project will be in good hands, responsible and caring hands, Mitul and his team are the way to go. I've had 100 projects on upwork, and this was not only the best, but BY FAR the best freelancer and team I've worked with.

It is a pleasure to be in a long term project and collaboration with this team, and our current success and money making form our product is literally because of Mitul and his team. Why settle for anything less, when you got perfection right in front of you to choose from?"

- Hamed T.
